

Ruby - Bug #8660

rb_thread_blocking_region deprecated, no alternative in ruby.h

07/20/2013 08:05 PM - mattconnolly (Matt Connolly)

Status:	Rejected		
Priority:	Normal		
Assignee:			
Target version:			
ruby -v:	2.0.0-p247	Backport:	1.9.3: UNKNOWN, 2.0.0: UNKNOWN
Description			
In "ruby/intern.h", the function declaration for rb_thread_blocking_region is deprecated. The comment says "Use rb_thread_call_without_gvl family instead", yet there are no functions from that family in the header that can be used by extensions.			
Should the method rb_thread_call_without_gvl be included in the header "ruby/intern.h" ?
